

NIOK PhD Platform

International Trip: Tarragona - Spain

The NIOK PhD Platform proudly presents the 2019 International Trip: Tarragona – Spain.

28/05-01/06

NPP organizes annual trips to companies and research institutes abroad that are major players in the catalysis field. This is an ideal opportunity to develop your network, whether you want to experience future employers' working culture, become inspired academically or explore the possibilities for collaboration!

Tarragona is a charming Roman town founded in the 5th century BC and a key port for European chemical industry. Plus the Institut Català d'Investigació Química (ICIQ) is world leading in artificial photosynthesis and catalysis research.

Cala Jovera Beach Tarragona
